DETAILED ACTION

Allowable Subject Matter

1. Claim 2 is allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The references of Bryant (U.S. Patent no. (Re. 36,076), Corbefin (U.S. Patent No. 6,269,243) with cited reference and the prior art of record fails to teach or suggest, the plural repeaters are mounted for each seat row at a position allowing radio communication with a terminal installed in each seat row and radio communication is carried out by selecting a repeater securing an optimum communication state from the plural repeaters, as cited in claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bryant (U.S. Patent no. (Re. 36,076) or Corbefin (U.S. Patent No. 6,269,243).

Regarding claim 1, Applicant is noticed that the preamble that includes the limitation of LAN system is not given weight.

Bryant teaches the radio repeater operation in vehicle (34) compartment for communicating with a terminal (36) installed in vehicle compartment through a repeater (14) by radio (see fig. 2 and abstract lines 10-17 and col. 2, lines 8-23),

Corbefin teaches the radio transponder (4) in vehicle/Aircraft (A) compartment for communicating with a terminal (Rs) and SP in vehicle/aircraft compartment through a repeater (4) by radio (see fig. 1 and col. 3, lines 39- col. 4, lines 11).

Moreover, Bryant teaches the repeater is mounted on the overhead of the back seat row (see fig. 2) and Corbefin teaches the repeater is mounted on the overhead of the seat row (see fig. 1). But Bryant or Corbefin fails to teach the repeater is mounted in front of each seat row.

However, the position of repeater in front seat of each row is obvious to one of ordinary skill in the art because the operation of the communication would ^{be} ~~still~~ the same.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gilhousen (U.S. Patent No. 5,559,865) discloses airborne radiotelephone communications system.

Horrer (U.S. Patent No. 6,321,084) discloses method for setting up a telecommunication link to persons in closed facilities, such as passenger transport means as well as a telecommunication system and network.

Art Unit: 2684

Itamochi (U.S. Patent No. 6,154,663) discloses portable telephone communications system.

Soh (U.S. Patent No. 6, 539028) discloses CSMA/CD wireless LAN.

5. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

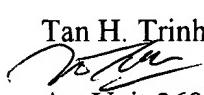

*Hand-delivered responses should be brought to Crystal Park II,
2121 Crystal Drive, Arlington, VA., Sixth Floor (Receptionist).*

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Trinh whose telephone number is (703) 305-5622. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung, can be reached at (703) 308-7745.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is **(703) 306-0377**.
